

SPEND MANAGEMENT

Source to Contract & Third-party risk management

The procurement solution built to help you strengthen supplier relationships, manage risk, and turn spend into a source of control and value.

End-to-end

Sourcing, suppliers, contracts and risk

PA23

Procurement Act 2023 compliant by design

4 weeks

From kick-off to a working foundation

The screenshot displays the 'oneAdvanced Procurement Act' interface. On the left is a vertical navigation menu with icons for Home, PA23, Sourcing activities, Contracts, Suppliers, Master agreements, Analytics, Team management, and Configuration. The main content area is titled 'Procurement Act' and features two summary cards: 'My Notices' with a count of 0 and 'All Notices' with a count of 43. Below these is an 'All Notices' section with search and filter controls. A table lists specific notices with columns for Notice Type, Contract Number, Contract Name, and Supplier.

Notice Type	Contract Number	Contract Name	Supplier
Contract Details Notice (UK7)	2500053	PL0066 - ECC Passenger Transport DPS 2023	HV Tech Supplies PWNR-1819-NYV
Contract Change Notice (UK10)	2500053	PL0066 - ECC Passenger Transport DPS 2023	HV Tech Supplies PWNR-1819-NYV
Contract Termination Notice (UK11)	2500053	PL0066 - ECC Passenger Transport DPS 2023	HV Tech Supplies PWNR-1819-NYV

Why now

Procurement is under more pressure than ever

Disconnected spreadsheets and legacy tools leave procurement teams firefighting - with poor visibility, missed savings and growing exposure. The cost of doing nothing is no longer acceptable.

The numbers behind the risk

40%

of negotiated savings can leak away without active contract management

KPMG

5-10%

of EBITDA is typically influenced by how well procurement is run

McKinsey & Company

£69bn

lost to procurement fraud across UK businesses each year

National Audit Office (NAO)

RISING SUPPLIER RISK

ESG, financial and operational risks across the supply base are harder to see and slower to act on, leaving organisations vulnerable when a key supplier fails.

VALUE LEAKING FROM CONTRACTS

Without active oversight, negotiated savings erode through auto-renewals and missed milestones, quietly draining margin year after year.

GROWING COMPLIANCE OBLIGATIONS

The UK Procurement Act 2023 introduces strict transparency and contract-KPI reporting duties. Manual processes can't keep pace - and non-compliance carries real reputational and legal risk.

TOO MUCH MANUAL EFFORT

Teams spend days chasing approvals, data or assembling reports, time that should be spent on strategy, negotiation and stakeholder value.

One solution, end to end

From first sourcing decision to live contract - in one place

A single governed platform - every activity, supplier, risk, contract and insight together, with compliance built-in at each step.

One end-to-end solution

Sourcing management

Pipeline, quotes, tenders, scoring and awards - guided for every route to market.

Supplier & contract

One source of truth - onboarding register, variations, approvals and reminders.

Third-party risk

Continuous supplier risk assessed, monitored and acted on across the lifecycle.

Analytics & insight

Detailed reports to assess contract performance, supplier risk and compliance.

Where you can

01

Plan & source

Pipeline, quick quotes, tenders & frameworks

02

Evaluate & award

Scoring, clarifications & transparent awards

03

Onboard & assess

Due diligence, questionnaires & risk scoring

04

Manage contracts

Register, variations, KPIs & reminders

05

Analyse & report

Procurement reporting & dashboards

Built for the way you work

Working foundation in 4 weeks

Guided configuration included. Our team works with yours to map your processes, configure the platform and get you live - in weeks, not months.

Integrates with finance & ERP

Procurement data flows into your finance systems.

Configurable for public & private

Tailored to regulated organisations across both sectors.

Sourcing management

Run every sourcing activity the right way, first time

Guided process templates take teams through each route to market - so the right steps, documents and approvals happen in the right order, every time.

✔ Built for every route to market

Requests for quotes, competitive opportunities and complex tenders - all with PA23 compliance embedded.

✔ Stage-gated checklists

Planning, at-market, evaluation and outcome stages keep activities on track and audit-ready.

✔ Transparent scoring & awards

Evaluate suppliers consistently with a defensible, fully documented audit trail.

✔ Frameworks & master agreements

Source compliantly against existing agreements to accelerate time to contract.

Number	Name	Value (ex Tax)
567678934	RS - PA23 - Transport 21.04.26 (UK 2,4,6&12)	£ 666,666.00
345676788	RS - PA 23 - Removal 20.04.26 (UK 2,4,6)	£ 666,666.00

The sourcing activities workspace - every live and closed activity with value, owner, process template and status at a glance.

Proven in practice

Previously, preparing for an audit took weeks. Now, the data is already there - **we can evidence compliance instantly.** That's a game-changer.

TheMet Office

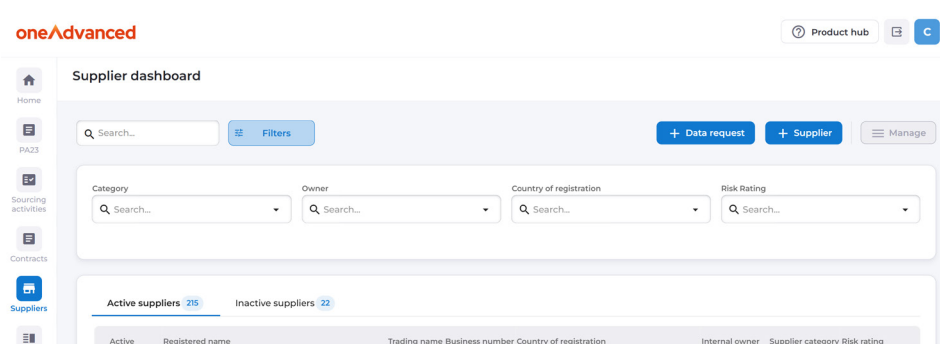

Procurement team • OneAdvanced Source to Contract customer

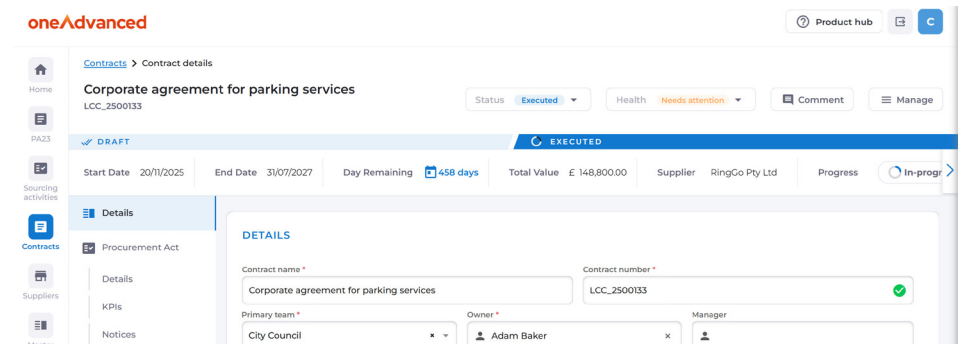

Supplier & contract management

A single source of truth for every supplier and contract

Onboard with built-in due diligence, then manage the full contract lifecycle so value is captured and obligations are never missed.

A governed supplier database - category, owner and risk rating at a glance

Contract detail with lifecycle stage, value, term and health tracking

Suppliers

✔ GUIDED ONBOARDING

Companies House lookup, questionnaires and contacts captured in one flow.

✔ RISK & ASSESSMENTS

Categorise, score and continuously monitor supplier risk and relationships.

✔ INSURANCES & CERTIFICATIONS

Track documents and expiry dates so compliance never lapses.

Contracts

✔ CENTRAL CONTRACT REGISTER

Active, expired and closed contracts with value, owner and term in one view.

✔ AUTOMATED REMINDERS

Renewal and review alerts stop value leaking through missed dates.

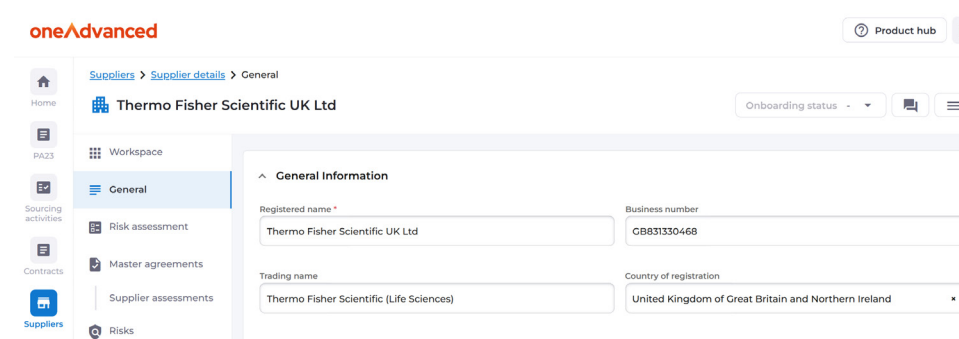

✔ OBLIGATIONS & MILESTONES

Track contractual deliverables so commitments are met, not missed.

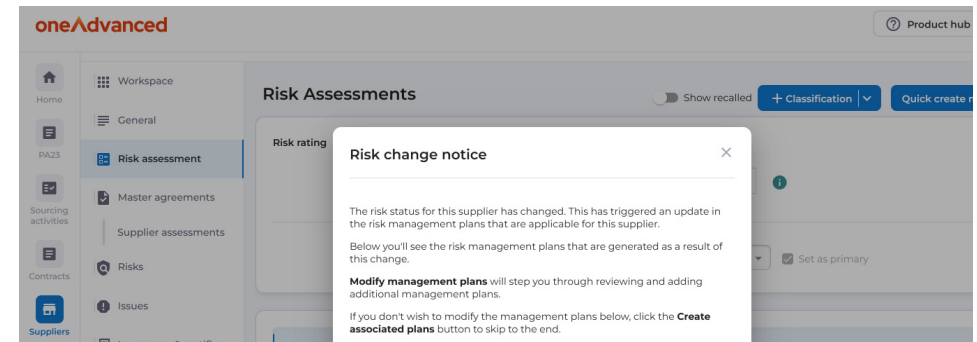

Third-party risk management

Know your suppliers' risk, before it becomes yours

Risk doesn't stop at onboarding. We make it continuous - assessed at entry, monitored through the relationship and acted on the moment it changes.

Every supplier carries a clear owner and risk profile across the relationship.

A change in risk automatically triggers the right management plan.

Assess

✓ RISK-BASED ONBOARDING

Score every supplier at entry on financial, ESG and operational criteria

✓ SCORING & GRADING

Likelihood x consequence gives a consistent, defensible grade.

✓ INSURANCE & CERTIFICATION

Track documents and expiry dates so cover never lapses.

Monitor & respond

✓ CONTINUOUS MONITORING

Exposure is tracked through the relationship, not just at onboarding.

✓ TRIGGER-BASED PLANS

Risk changes automatically raise management plans and escalation.

✓ SINGLE RISK REGISTER

One auditable view of risk across every supplier and contract

From the front line of due diligence

I completed **more due diligence in six months** than a whole team of four did in two years at my previous organisation. It's **slicker, it's quicker**, and it builds the due diligence scope from the risk profile rather than going in blindly and asking everything.

Megan Hogg

Procurement act 2023 & analytics

Prove your compliance and turn data into decisions

Compliance obligations are handled in the platform, not in spreadsheets. Statutory notices and contract KPIs are managed where the work happens - and surfaced in dashboards that turn data into action.

Live dashboards turn spend, risk and compliance data into action.

Procurement intelligence

Centralised insights across sourcing, contracts, suppliers and risk to guide strategy.

Statutory notices automated

Notices are raised and tracked against the contracts they relate to, with a complete audit trail for every submission.

Visibility and control

Generate and manage a full set of statutory notices - from contract details to change and termination, directly against your contracts.

OneAdvanced will make it simple for my team to meet the **transparency notice requirements** of the new regulations. Business-as-usual activities in procurement are time-consuming enough, so having a system to capture important details across the contract lifecycle and **automatically publish to the Cabinet Office central platforms** will make complying so much easier

Director of Procurement and Sustainability
Metropolitan Thames Valley Housing

Choose your starting point

Three packages along your procurement maturity journey

Start where you are today and grow as your team matures - each package builds on the last, with the same connected platform underneath.

Most Popular

Standard

For procurement teams running on spreadsheets and email today - get full control and visibility of contracts and suppliers in just 4 weeks.

- ✓ Contract register & reminders
- ✓ Supplier database & risk register
- ✓ Compliance notices
- ✓ Core dashboards

Plus

For organisations ready to elevate - add continuous third-party risk, supplier performance and the insight to close data gaps.

- ✓ Everything in Standard
- ✓ Milestones & performance
- ✓ Third-party risk management
- ✓ Frameworks & master agreements

Pro

For mature teams driving strategic value - full source-to-contract with advanced analytics and finance integration.

- ✓ Everything in Plus
- ✓ Advanced analytics
- ✓ Quick quotes & self-serve sourcing
- ✓ Finance & ERP integration

THIRD-PARTY RISK

Managed continuously across the supply base - a key differentiator, not an add-on.

4 WEEKS

Guided configuration included. Our team works with yours to map your processes, configure the platform and get you live - in weeks, not months.

PUBLIC & PRIVATE

configured for regulated organisations across both sectors.

Cut costs, strengthen supplier relationships, and take control of every contract, and every risk.

Transform your procurement and third-party risk management.
We'll show you a path to compliance and value in weeks, not months.
