

oneAdvanced

One platform, **powering your progress**

Finance, spend, governance, and workforce
management integrated on a single platform.
AI-infused. Cybersecure.

Transform your operations, elevate your strategy

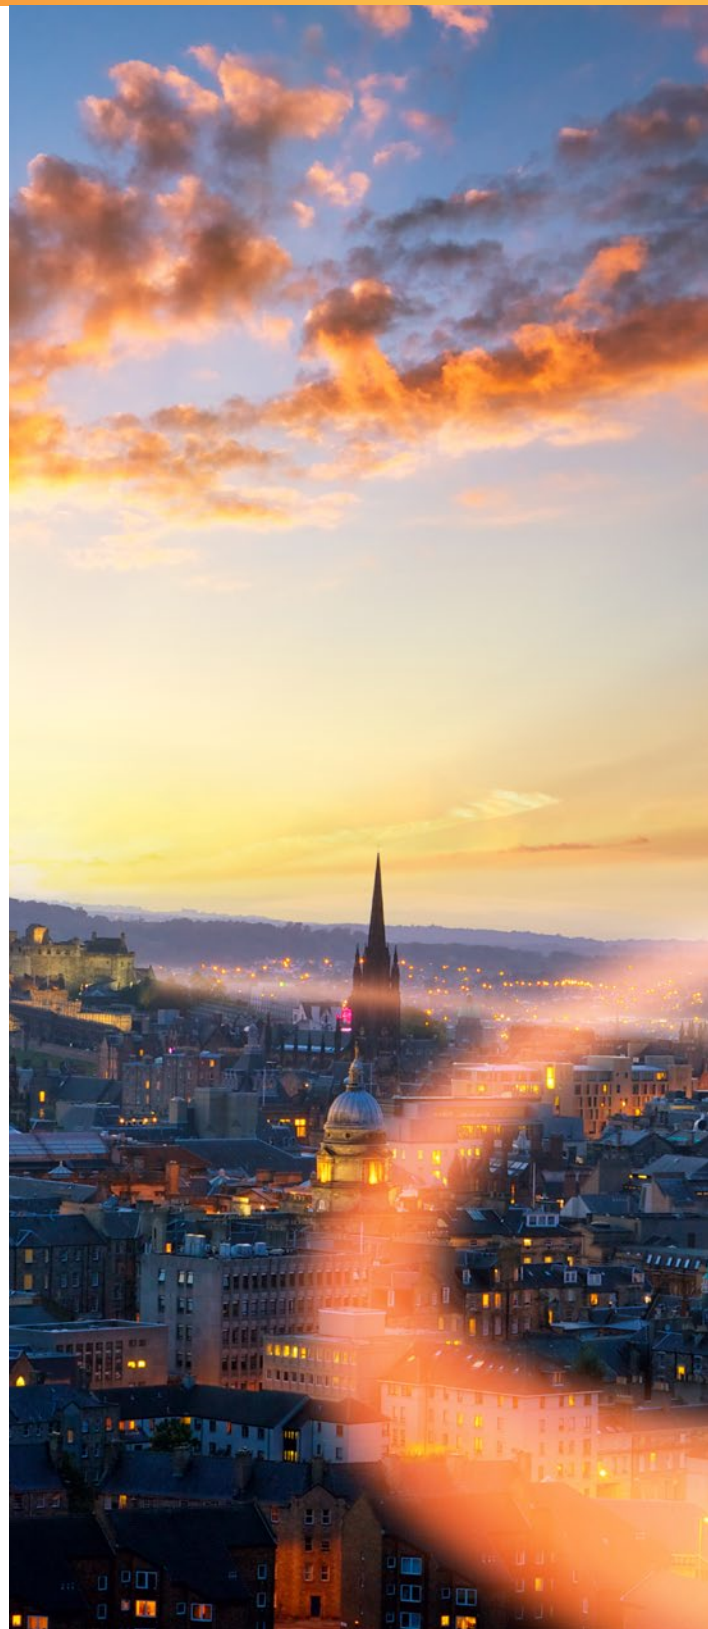

In a world changing faster than ever, staying ahead means embracing innovation.

OneAdvanced is here to transform your business in ways you can only imagine, helping you say goodbye to silos and slow decision-making. We are a proudly British company, powering the functions of finance, HR, and operations, while also meeting the modern ambitions of the CTO within leading UK businesses.

Our industry-leading software, developed alongside sector experts, offers the UK's first enterprise-grade platform with AI capabilities, without the enterprise price tag.

Is your business facing these challenges?

- 1** Siloed departments hindering collaboration and decision-making?
- 2** Outdated systems struggling to keep up with modern demands?
- 3** Difficulty in harnessing the power of data and AI for real insights?
- 4** Concerns about information security in an increasingly complex digital landscape?
- 5** Struggling to optimise your workforce and manage costs effectively?

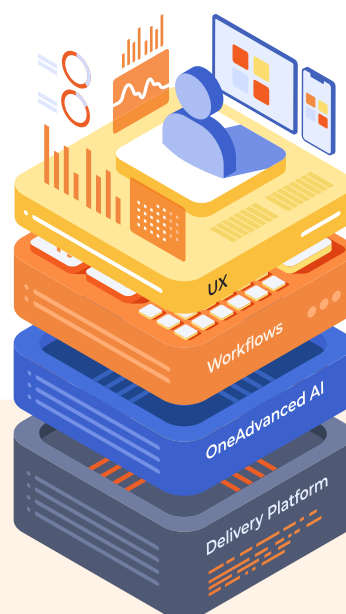

The OneAdvanced difference: One platform, connecting your entire business

Imagine a single, state-of-the-art, secure platform that brings together finance, spend, governance, and workforce management. Our UK-native, AI-embedded software platform provides a modern alternative to traditional ERP providers, delivering enterprise capabilities without the “ERP” baggage.

Key benefits for your organisation:

- **For the finance team:** Gain best-in-class financial management, from source-to-pay and record-to-report, ensuring compliance and actionable performance dashboards.
- **For the HR team:** Maximise the performance and potential of your people with strategic workforce planning, talent management, and streamlined HR processes.
- **For the operations team:** Optimise operations from plan-to-produce and make-to-dispatch, driving efficiency, quality control, and customer delivery.
- **For the IT team:** Leverage a composable system with 3rd party connectedness, AI-driven insights, robust data security, and a platform built for digital transformation.

Tap into the full potential of AI

We open the gates to AI for growing businesses like yours, equipping your leadership with the same sophisticated intelligence as large enterprises, at a fair price. From AI-driven insights to generative AI capabilities, our platform is designed to transform the way you work.

Fluent in your industry's language

You shouldn't have to explain the nuances of your industry to your software partner. We are sector specialists, fluent in the rhythms, realities, and regulations of:

Wholesale & Logistics

Manufacturing

Retail

Passenger Transport

Business Services

Security you can trust: British-grade tech

Information security is a board-level agenda item. We've integrated world-class cybersecurity into the very fabric of our platform, recognised by the government and backed by significant investment. With features like Vulnerability Management, Penetration Testing, Endpoint Protection, and a 24/7 Security Operations Centre, your sensitive information stays safe and smart in the UK.

We engage with business leaders and industry experts to truly understand your needs, solving real-world challenges to cut costs and maximise margins. Our platform can measure and benchmark your performance, delivering AI-powered insights to help you outpace the competition.

Ready to reimagine your organisation?

oneAdvanced

Don't let outdated technology hold you back. AI is a generational disruption, and now is the time to leverage its transformative capabilities. **With OneAdvanced you get:**

Sector Aligned Software Portfolios

We've brought together a comprehensive suite of tools to manage your core business functions, enabling everyone to contribute to key goals.

People & Workforce Management

We provide a connected suite of tools to manage your most valuable asset - your people.

Finance, Spend and Governance

Bringing your financial operations together in one secure platform for better control and insight.

One Foundational Platform

This is the secure and scalable base for everything. It's a composable system with robust cloud services, API/Integrations, and powerful data insights.

British-Grade Security You Can Trust

We protect your business with security woven into the very fabric of our platform.

AI-Enabled

We've embedded Artificial Intelligence across the platform so that you can fully unlock your AI agenda and gain a significant competitive advantage.

**Let's start a
conversation.**

Discover how OneAdvanced can power progress for your organisation. We'll begin with a value creation exercise to understand how we can deliver tangible returns for your business.
