# Supporting the work that **powers prosperity**

Managed IT Services

# Why us?

**OneAdvanced IT Services is a leading UK Managed Service Provider with deep industry expertise.**

It's a jungle out there. Security threats, evolving AI, and constant uncertainty. With 24/7 UK-based support, round-the-clock monitoring, secure proprietary AI, both NIST and ISO 27001 accreditations, plus over £25 million invested in cybersecurity, we don't just support your tech - we're the safe pair of hands you can trust.

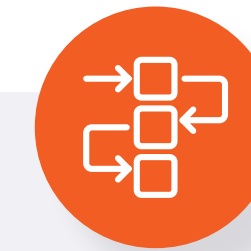

## **Trusted partner for financial organisations**

We manage over £70bn in assets under management across our pension fund customers.

## **Designed for regulatory rigour**

ISO 27001 certified, NIST-aligned, and UK-based, with secure proprietary AI.

## **Deep financial sector knowledge**

We have a deep understanding of your workflows, compliance requirements and operational goals.

## **Driven by outcomes, not just outputs**

We measure success through XLA's (Experience Level Agreements) that truly reflect what matters most to your teams.

## **Strategic data management**

We help you make informed decisions, drive business growth, and stay ahead of the competition.

## **Secure innovation**

As pioneers of our own proprietary AI - OneAdvanced AI, we can help you innovate with confidence.

## **Growth without limits**

We provide flexible services to scale and adapt with your business needs.

## **Maximising every pound**

We help maximise the value of your IT investments through practices such as FinOps and our innovation engine.

# Your priorities are our purpose

**You shouldn't have to explain the nuances of your industry to your Managed IT Services provider. They should just get it. The business metrics that matter most to you, are the benchmarks we measure ourselves against.**

Offering strategic advice, assessments, and road mapping to help customers define their IT strategy, optimise existing investments and environments, and plan for future transformations.

**1**

**Securing trust in  
a highly regulated  
environment**

**2**

**Driving operational  
resilience at  
every layer**

**3**

**Delivering scalable  
infrastructure  
without sacrificing  
control**

**4**

**Delivering value  
from every  
pound spent**

**5**

**Enhancing  
experience for  
an agile, digital  
workforce**

# Core Services

Each of these pillars sit at the core of our overarching portfolio strategy.

Together, they build a strong foundation that drives digital transformation, boosts resilience and accelerates growth, empowering critical sectors to become more agile, secure, and innovative, safeguarding communities across the nation.

## Connectivity

When your connection breaks, your world freezes. We provide secure, high-speed access everywhere, so nothing stands between you and what matters.

## Cybersecurity

We fight against evolving threats, minimise risk, and help you stay confidently compliant through relentless protection, vulnerability insights, and trusted expertise.

## Digital Workplace

We empower modern teams with a secure, seamless experience. From Microsoft 365 to device management, collaboration tools, and user experience monitoring.

## Cloud & Infrastructure

We build agile platforms, built to handle your critical workloads, whether public, private or hybrid. From IaaS, hybrid cloud, modern data centres to platform optimisation.

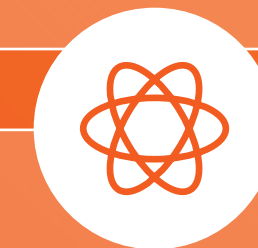

## Service Management

We provide proactive, people-first support with clear SLAs and a commitment to continued improvement. From ITIL-aligned operations to service desks, reporting and governance.

## Consultancy

We deliver sharp strategic advice, assessments, and clear roadmaps to help you unlock the full potential of your IT, optimise your existing investments, and confidently plan for future transformations.

## AI & Data

We harness the power of your data using AI, automation, and analytics to fuel smarter decisions. From data modernisation to dynamic dashboards and machine learning.

## Business Continuity

We prepare for the unexpected so your vital services never fail. We provide backups, disaster recovery, resilience tests, and seamless continuity, no matter what.

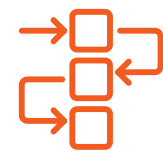

# Core Pillars of the Approach

## Proactive Service Delivery

Staying one step ahead by preventing issues before they arise through predictive monitoring and seamless automation.

## Seamless Integration

Aligning your IT services with your business goals, evolving as your needs change.

## Continuous Improvement

Through regular check-ins and smart enhancements, we keep your systems sharp, agile, and future-ready.

## Experience-Driven Outcomes

Measuring success through XLAs, putting user satisfaction and business impact front and centre.
