With OneAdvanced Managed Cybersecurity Services.

The challenge

While digital transformation boosts business agility, it also introduces significant security complexities.

With 80% of companies experiencing cloud security breaches in the past year*, the reality of cyber threats has intensified and become a relentless reality. This represents a major risk to business operations and a **critical need for a new security approach.**

This challenge leads to critical business questions:

- Are we managing too many tools and alerts, and how can we consolidate these to **reduce complexity whilst ensuring coverage?**
- How do we ensure **uptime, performance, and quick remediation** across hybrid environments, despite skills gaps?
- How can we align our security strategy with **complex compliance frameworks** while confidently reporting to the board?

We believe your security should be an enabler, not a source of complexity.

We provide managed cybersecurity services designed for leaders who want to simplify their security estate and **protect their organisation across every environment, 24/7.**

Why managed cybersecurity services?

Managed cybersecurity services provide a proactive, streamlined approach to safeguarding your organisation against cyber threats. They offer:

- Access to advanced expertise**

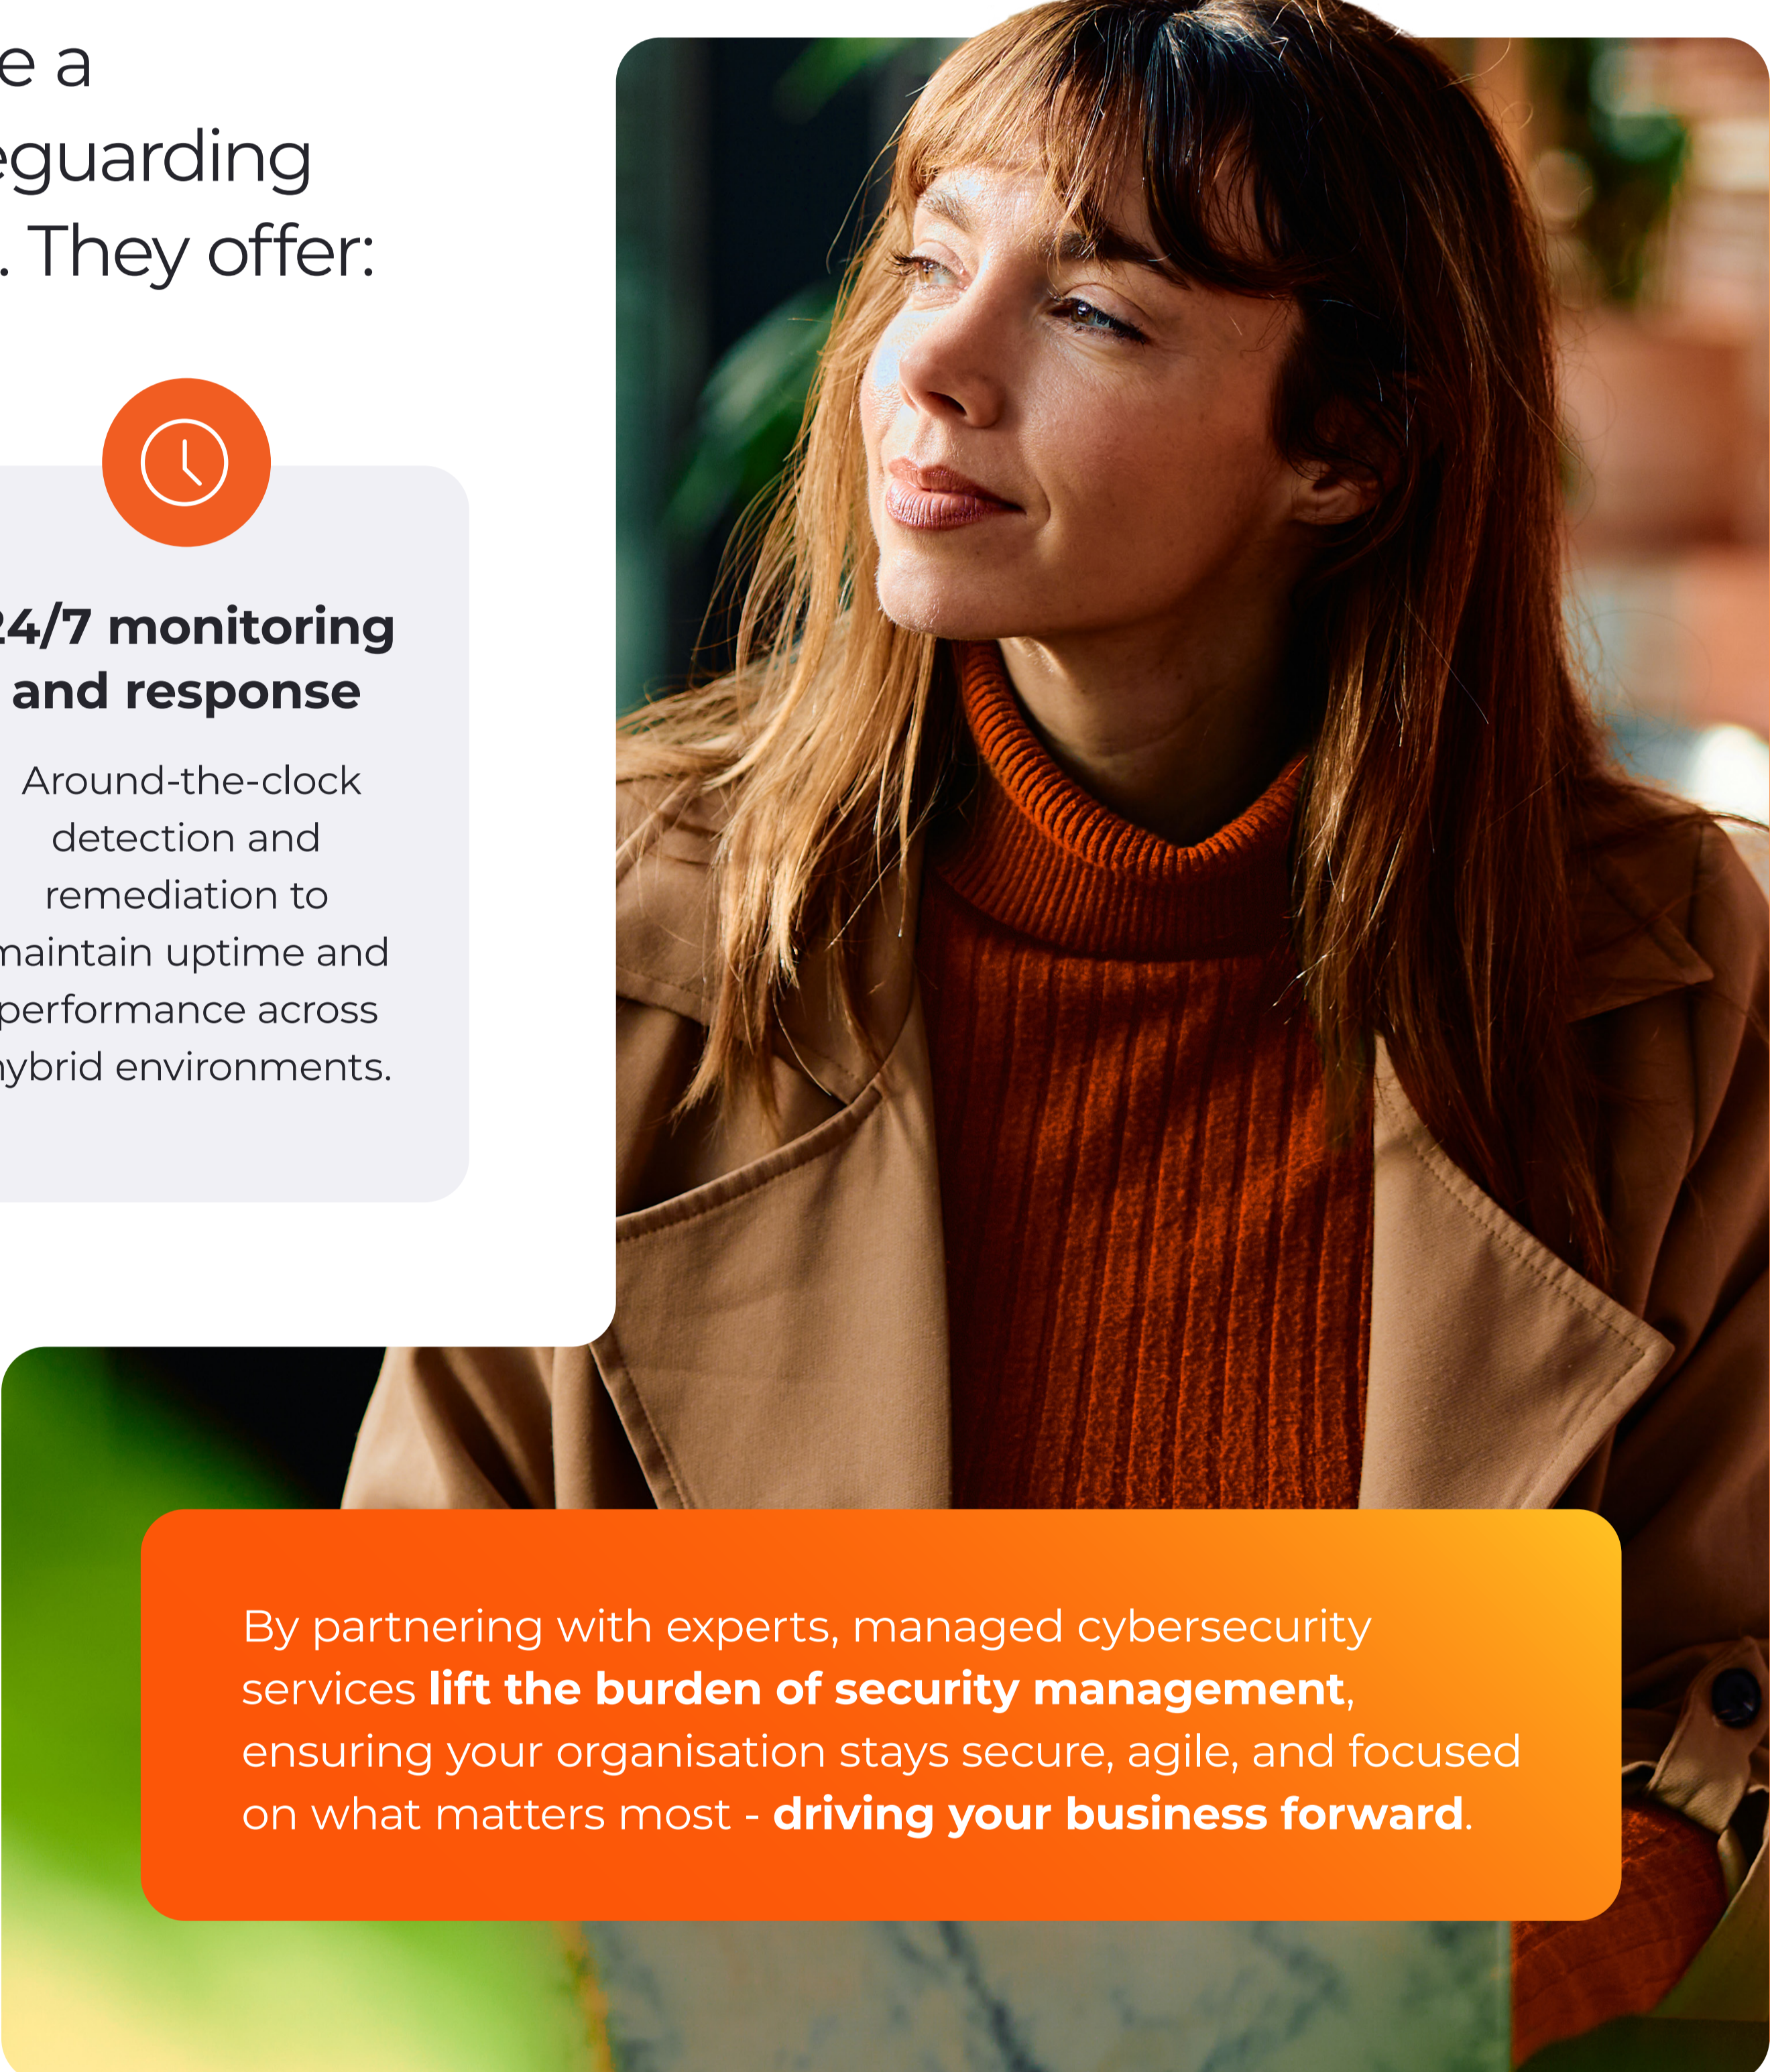

Leverage a team of specialists with deep knowledge and experience, often beyond what an in-house team can provide.
- Simplified security management**

Consolidate tools and alerts to reduce complexity while ensuring comprehensive coverage with access to the latest tools.
- 24/7 monitoring and response**

Around-the-clock detection and remediation to maintain uptime and performance across hybrid environments.
- Compliance confidence**

Align with complex regulatory frameworks and provide board-ready reporting with ease, whilst freeing up your internal team.
- Cost efficiency and scalability**

Avoid the high costs of hiring and upskilling a large in-house team while benefiting from predictable pricing and adaptable solutions.

Why OneAdvanced IT Services for Managed Cybersecurity?

- T**

Transformational

 - We turn complexity into clarity.
 - By integrating industry leading cybersecurity tools with our managed services, we help organisations evolve from reactive security to proactive resilience.
 - Cybersecurity that scales with you while providing predictable costs.
- R**

Resilient

 - We know resilience first-hand, having lived experience we've learned from.
 - Our UK SOC provides 24/7 monitoring, detection, and response; maintaining operations, no matter what.
 - Compliance alignment ensures you're resilient to regulatory as well as technical risk.
- U**

United

 - Strategic partnership with Microsoft enabling us to integrate tools into our services.
 - Relationships with leading security vendors extend our capability across public, hybrid, and on-premises environments.
 - Sector-specific experience gives us compliance and workflow knowledge others can't match.
- S**

Secure by Design

 - Security embedded from the ground up, not bolted on.
 - UK data sovereignty ensures sensitive data never leaves jurisdiction.
 - Our managed service is designed to reduce complexity, tool sprawl, and human error.
- T**

Transparent

 - Clear reporting that gives CIOs and CISOs board-ready assurance.
 - ROI and TCO models to demonstrate predictable costs and measurable value.
 - Health Checks and assessments provide visibility into risks and progress at every stage.
