

Clarkslegal LLP enhances timekeeping efficiency with Time Capture

“Time Capture has transformed how we track billable hours, making timekeeping faster, more flexible, and easier—streamlining our workflow and improving efficiency firm-wide.”

Sevastiyan Raychev, Head of IT

About Clarkslegal LLP

Clarkslegal LLP is recognised as a leading, full-service commercial law firm with over 100 years of experience in the UK and internationally. The firm provides commercially driven strategic advice to start-ups, SMEs, PLCs, and large multinationals. With a team of expert lawyers who are leaders in their fields, Clarkslegal works in partnership with each client as a trusted adviser, tailoring solutions to their unique needs.

As a founder member of TAGLaw, one of the world’s largest legal networks, Clarkslegal offers clients access to high-quality legal services in nearly 100 countries. The firm has also achieved high rankings in legal directories, such as Chambers UK and the Legal 500.

Their OneAdvanced Experience

Seeking a more user-friendly solution for tracking billable hours, Clarkslegal LLP, a well-established user of Partner for Windows (P4W), integrated Time Capture, previously known as Carpe Diem, to enhance time tracking and offer greater flexibility to their fee earners.

We spoke with Sevastiyan Raychev, Head of IT, to learn more about their experience using Time Capture.

“Time Capture has significantly improved how quickly we log hours. With P4W, we could only track time in the office or via remote desktop, but now we can record on any device from anywhere, and entries are visible almost instantly.”

“User adoption of Time Capture was impressively quick. After going live, within about a month and a half to two months, the entire firm had fully adopted it. Everyone was eager to get trained and start using the system, which made the transition smooth and efficient.”

“With Time Capture’s cloud capabilities and timers like Smartimers, tracking time has become much more intuitive and streamlined. Fee earners no longer need to jot down hours to submit later.”

“Additionally, the platform’s single sign-on (SSO) feature has added an extra layer of security and convenience, making access more seamless for users.”

Firm wide efficiency

“By streamlining the time capture process, Time Capture has made it easier not only for our fee earners, but for our finance team as well. With faster logging and fewer delays, they no longer have to chase down missing hours. In cases where time isn’t submitted, managers can easily step in and submit timesheets, further simplifying workflows.”

Would you recommend Time Capture?

“We’re extremely happy with Time Capture and would recommend it to any firm using on-premise solutions, especially those with Partner for Windows. The integration was seamless, and we didn’t have to make any changes to our accounts processes. The implementation went smoothly, and we’ve seen no disruption to our workflows since adopting it. It’s truly a great tool for any firm looking to improve their time tracking capabilities.”
