

ILP & Markbook

Powerful Data Connections

Our ILP & Markbook solution, ProMonitor, can connect to the OneAdvanced Assessment & Learning and ePortfolio solutions, bksb and Smart Assessor, allowing your classroom staff to enrich their data and functionality all from within one system.

Assessment & Learning Connections

Our Assessment & Learning solution, bksb, allows you to view assessment data and progression trends embedded into your learner data.

Intelligent, data-driven assessment

Our connection with bksb goes beyond importing data fields – interactive functionality allows for flexible interaction between the two systems, allowing you to make the most of bksb data and features from your ePortfolio.

Use of bksb's AI-powered assessment tools allow you to enrich your ProMonitor data with in-depth insight and learner evaluation. With access to their own skills progress and targets, your learners can engage with their learning and take ownership of their achievements.

Key benefits

Intelligent reporting – Use in-depth progression data from bksb in your reporting and risk assessments for powerful insight. Make the most of bksb's AI-driven learner evaluation to identify any risk issues during the learner journey.

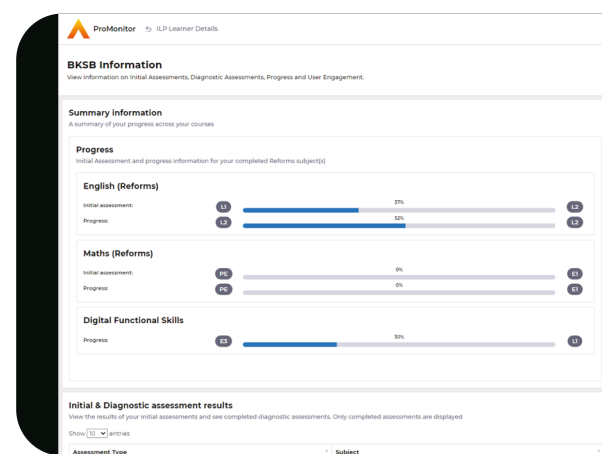

Comprehensive learner tracking – bksb course information can be fully embedded into your ProMonitor learner data, with bksb courses linked to your ProMonitor courses, learner meetings and SMART targets.

Detailed analysis – Filter your student groups by bksb course data to drill down into working levels and identify progression trends.

Empower learners – Your learners using ProPortal can access bksb data, allowing them to engage with their skills progress and set targets.

Key Capabilities:

- Synchronise assessment and attainment information
- Import qualification data
- Identify evidence gaps
- Self-service learner assessment and exam preparation
- Group learners by progression levels
- Knowledge, Skills and Behaviour (KSB) tracking
- Share meetings, reviews and targets between different teams using different solutions
- Report on data across different systems

ePortfolio Connections

Smart Assessor is the next generation in ePortfolio technology, providing in-depth tracking across Apprenticeship Standards. The ProMonitor connection with Smart Assessor allows your classroom-based staff to have an overview of a learner's progress through their Standard without having to log in Smart Assessor.

Learner progression at the heart of your data

This connection brings together different systems to have a single source for all of your learner progression data. Avoiding the additional training and licencing costs to set up additional Smart Assessor logins, your classroom-based staff can instead make the most of the sophisticated Standards tracking and accurate qualification data in Smart Assessor with only one login needed.

Make the most of the latest Advanced MDS design in ProMonitor to display your Smart Assessor data in a modern and accessible user interface.

Key benefits

Flexible reporting – Build custom reports using data derived from Smart Assessor with the ProMonitor report builder.

Progress benchmarking – Display assessment criteria and Knowledge, Skills and Behaviours (KSBs) in the ProMonitor FE and HE markbooks, allowing you to record detailed and meaningful progress data.

Accurate data – Through integrating with the Qualifications Module from Smart Assessor, ProMonitor can maintain up to date Ofqual data as a background task without the requirement for you to download the latest CSV files from the Register.

Seamless audit trails – Display your evidence data from Smart Assessor in ProMonitor to confirm that any auditing gaps are filled in preparation for inspection.
